Job title	WASH Officer (Host communities Juba)
Number of Position:	01 (One)
Country Programme:	South Sudan
Location:	Juba HQ
Reports to:	Deputy WASH Manager
Position open for:	South Sudanese Nationals ONLY
Desired Starting Date:	ASAP
Closing date for application:	08th/October/2018

General Description of the Programme:

The Health Support Organization is a registered national nonprofit organization dedicated to saving lives and relieving human suffering through health care delivery and relief and development programmes.

Formed in 2005, incorporated in 2008 by volunteer doctors and medical clinical officers to support the national efforts in addressing health challenges in South Sudan, THESO is a private, voluntary, nonpolitical, nonsectarian organization. Its mission is to implement evidence-based, culturally sensitive, innovative projects promoting health, according to perceived public health needs and priorities as understood through quality research. By offering grass root capacity building and health care to local populations and emergency health assistance to people at high risk, and with the flexibility to respond rapidly to emergency situations, THESO improves poor health care systems to a sustainable self-reliance level.

THESO is implementing public health Programmes in Central Equatoria, Eastern Equatoria, Warrap, Unity and Jonglei States. THESO Public health activities include curative primary

health care, based on the management of primary health centres and units; preventive health care including HIV/AIDS messaging and testing, malaria, TB and other communicable diseases control, and hygiene promotion; community management of malnutrition, maternal and child health and reproductive health; diseases surveillance, water and environmental sanitation, grass root capacity building, and health infrastructure development.

Primary Duties and Responsibilities

The Field WASH Officer performs a wide range of duties including some or all of the following:

- Attend monthly WASH Cluster meeting both count, State and national levels; coordinate all WASH activities in Juba County Host communities.
- Coordinating and undertaking monitoring of construction of WASH facilities to ensure WASH infrastructure is delivered to contractually agreed standards.
- Design WASH facilities in consultation with the beneficiaries especially the women and girls for safety and usage.
- Design and implementation of operation and maintenance training for school and community WASH management committees (block and zone leaders)
- Plan and supervise community assessments, monitor water supplies and sanitation in the camp and recommend interventions to respond to the needs of the Host communities in Juba.
- Plan and manage Water and Sanitation activities at the field level, including financial and human resources, in collaboration with the line manager
- Support the field in carrying out selection, design, and construction/rehabilitation of appropriate water and sanitation systems including: water treatment, solid waste management and construction of WASH facilities
- Ensure that the project engages local stakeholders and develops local capacity for longer-term sustainability
- In collaboration with the logistics and finance departments, ensure that materials, supplies and financial resources are available in the field for programme activities as needed

- Designing and Implementation of Hygiene Promotion Activities in consultation with the beneficiaries.
- Designing hygiene promotion IEC materials and activities for partner schools and communities
- Assist the Hygiene Promotion Officer in the correct implementation of the PHAST (participative hygiene and sanitation transformation) and SWASH+ (School Water Sanitation and Hygiene) methodologies
- Assist in the design and implementation of the hygiene promotion program and materials based on the outputs of the PHAST & CHAST programme methodologies
- Monitor the impact of hygiene promotion activities and provide regular, timely and accurate narrative information for inclusion in program reports
- Ensure that hygiene promotion activities are in line with SPHERE standards
- Integrate public health concepts into hygiene activities and ensure close collaboration with health partners
- Design all the necessary technical drawings in line with the project implementation
- Develop all BoQs for the WASH project.
- Participate in project proposal developments and budgeting

Qualifications:

Bachelor's degree or Diploma in the field of Water Engineering, Public health, Environmental Health, Community Development, SWASA, etc.)

Experience / Competencies

1-2 years' experience in Hygiene promotion and WASH activities

Language: fluency in English, Arabic and Dinka

Period: 3 Months, renewable basing on performance and availability of funds.
