To Whom It May Concern

Dear Sir/ Madam,

Eskallade Technology South Sudan was hired by us in 2016-17 for audit of our accounting system, installation, training of our staff and networking of QuickBooks accounting software and did an excellent job in all these areas. Eskallade helped us get our QuickBooks fully installed, implemented and running smoothly.

We were happy with advanced QuickBooks training done by Mr. Herman Williams, he made sure we understood how chart of accounts is organized in a certain way, how to use the software to record transactions, bank reconciliation, track project funds, budget vs actual, expenses, assets and liabilities, exchange rates, depreciation of assets, how to use petty cash, asset listings, manage vendors and donors, reconcile your accounts, and how to run reports quickly and easily get the data you need.

I highly recommend Eskallade Technology South Sudan for delivery of QuickBooks accounting software services to any organization that is seeking high quality standards.

In case of any questions, please feel free to contact me.

Sincerely,

Oroma David Fabiano
