

War Child Canada -Call for Partnership 2019-

Vision: A world where no child knows war.

War Child Canada's Mission: War Child Canada works with war-affected communities to help children reclaim their childhood through access to education, opportunity and justice. War Child Canada takes an active role in raising public awareness around the impact of war on communities and the shared responsibility to act.

Partnership Statement

War Child Canada's local investment and capacity building model centres on the capacity of individuals, communities and partner organizations to independently deliver program activities. This model emphasizes accountability to partnership principles and the organization's accountability to civil society, children, youth and women's groups, government, networks, coalitions and local partner organizations, partners, communities, and other stakeholders with whom War Child Canada its partners work. War Child Canada frequently works in humanitarian settings. However War Child Canada's programming approach differentiates itself to other organisations in these contexts who are frequently providing emergency aid. Education, livelihoods and legal protection programming requires a different approach, that builds partnerships that result in longterm community ownership, stemming from the engagement of local communities at each step of the management cycle.
