ERT WASH Technician

Job Purpose: Contribute to the implementation, management and supervision of Medair's WASH Emergency Response Programme.

A. Key Responsibilities.

Technical

- Ensure timely and quality construction and/or rehabilitation of water and sanitation infrastructure as appropriate for the community served.
- Participate in the planning and implementation of WASH needs assessments amongst target communities.
- Appropriately involve the beneficiary population in all phases of the projects.
- Seek for the continual improvement of both the technical implementation and the processes of the WASH programme.

Quality Management

- Ensure a high standard of work at all times, aiming to achieve SPHERE standards or better for all interventions.
- Ensure effective integration and mainstreaming of gender into the project in liaison with the WASH Advisor.
- Review and suggest recommendations for WASH activities and strategy to the PM and WASH Advisor.

Communication

- Provide regular field reports to the Project Manager by email, telephone or HF radio communication.
- Provide feedback on performance of contractors and casual laborers and seek guidance as required for dealing with any issues.
- Contribute to writing assessment and intervention reports immediately upon returning from field locations.
- Develop and maintain good working relationships with the NGOs, counterparts, and other agencies working in the areas of project implementation.
- Attend meetings with local authorities on behalf of Medair.
- Refer to the WASH PM before making any commitment on behalf of Medair whether verbal or written.

HR/Staff Management (in the field)

- Hire, manage and ensure proper payment of casual laborers in field locations for the construction and rehabilitation of WASH infrastructure
- If appointed as the field team leader, ensure other team members fulfil their respective roles adequately and provide support and guidance to enable them to do so as required.
- Provide support, assistance and mentoring to more junior members of staff as required to encourage their professional development

Logistics/Finance

- Provide support as necessary to the ERT logistics team and Juba-based country logistics team in managing stock levels of tools, equipment and materials in the Juba warehouse.
- Obtain quotations and procure services and materials in field locations with or without the support of field logisticians.
- Manage team supplies of food and household items and tools/materials for interventions when in field locations.
- Manage cash in the field and maintain detailed and accurate records of all expenses.
- sessions between Medair and the community to actively identify protection concerns

B. Person Specifications

Essential

- Technical training/certification in borehole repair/rehabilitation.
- 2 years' experience working in borehole repair, water supply and sanitation in emergency settings
- Good spoken and written English
- Basic knowledge of Microsoft Office applications (Word, Excel, Powerpoint and Outlook) and email

Desirable

- Diploma in Community Based Development; Knowledge of Participatory methodologies
- Good spoken (Juba) Arabic and knowledge of other languages common in South Sudan
- Advanced knowledge of Word and Excel functions (e.g. special formatting, formulas, etc.)

Applications deadline: **22nd March 2019.**

Only shortlisted candidates will be contacted.

Please submit your application comprising (1) a comprehension 3 paged CV that includes contact details, education and training background, work experience and 3 referees, and (2) an application support statement on how you meet the Person Specifications outlined above **to:**
