## Capacity Main Specification:

| Capacity(Liters) | Thickness | Weight | Size | Packing Size |
| :---: | :---: | :---: | :---: | :---: |
| 250 liters | 0.7 mm | 3 Kg | $1 \mathrm{~m} * 0.85 \mathrm{~m} * 0.3 \mathrm{~m}$ | $30 \mathrm{~cm} * 30 \mathrm{~cm} * 20 \mathrm{~cm}$ |
| 500 liters | 0.7 mm | 4.5 Kg | $1.7 \mathrm{~m} * 0.85 \mathrm{~m} * 0.35 \mathrm{~m}$ | $1.7 \mathrm{~m} * 0.85 \mathrm{~m} * 0.35 \mathrm{~m}$ |
| 1,000 liters | 0.7 mm | 7.5 Kg | $2 \mathrm{~m} * 1.3 \mathrm{~m} * 0.4 \mathrm{~m}$ | $40 \mathrm{~cm} * 30 \mathrm{~cm} * 20 \mathrm{~cm}$ |
| 2,000 liters | 0.7 mm | 10 Kg | $2.3 \mathrm{~m} * 1.8 \mathrm{~m} * 0.5 \mathrm{~m}$ | $40 \mathrm{~cm} * 40 \mathrm{~cm} * 20 \mathrm{~cm}$ |
| 3,000 liters | 0.7 mm | 13 Kg | $2.8 \mathrm{~m} * 1.8 \mathrm{~m} * 0.6 \mathrm{~m}$ | $45 \mathrm{~cm} * 45 \mathrm{~cm} * 25 \mathrm{~cm}$ |
| 5,000 liters | 0.7 mm | 18 Kg | $2.8 \mathrm{~m} * 2.8 \mathrm{~m} * 0.65 \mathrm{~m}$ | $60 \mathrm{~cm} * 40 \mathrm{~cm} * 30 \mathrm{~cm}$ |
| 10,000 liters | 0.8 mm | 32 Kg | $3.85 \mathrm{~m} * 3.85 \mathrm{~m} * 0.7 \mathrm{~m}$ | $80 \mathrm{~cm} * 50 \mathrm{~cm} * 40 \mathrm{~cm}$ |
| 20,000 liters | 0.9 mm | 67 Kg | $6.8 \mathrm{~m} * 3.8 \mathrm{~m} * 0.8 \mathrm{~m}$ | $105 \mathrm{~cm} * 53 \mathrm{~cm} * 42 \mathrm{~cm}$ |
| 30,000 liters | 0.9 mm | 97 Kg | $6.6 \mathrm{~m} * 5.8 \mathrm{~m} * 0.8 \mathrm{~m}$ | $115 \mathrm{~cm} * 56 \mathrm{~cm} * 43 \mathrm{~cm}$ |
| 50,000 liters | 0.9 mm | 185 Kg | $8.6 \mathrm{~m} * 7.3 \mathrm{~m} * 0.8 \mathrm{~m}$ | $110 \mathrm{~cm} * 75 \mathrm{~cm} * 70 \mathrm{~cm}$ |
| 70,000 liters | 1.2 mm | 285 Kg | $8.9 \mathrm{~m} * 8.8 \mathrm{~m} * 0.9 \mathrm{~m}$ | $110 \mathrm{~cm} * 100 \mathrm{~cm} * 60 \mathrm{~cm}$ |
| 100,000 liters | 1.2 mm | 350 Kg | $13 \mathrm{~m} * 7.8 \mathrm{~m} * 1 \mathrm{~m}$ | $110 \mathrm{~cm} * 110 \mathrm{~cm} * 60 \mathrm{~cm}$ |
| 200,000 liters | 1.2 mm | 670 Kg | $17 \mathrm{~m} * 11.7 \mathrm{~m} * 1.1 \mathrm{~m}$ | $225 \mathrm{~cm} * 75 \mathrm{~cm} * 75 \mathrm{~cm}$ |
| 300,000 liters | 1.5 mm | 1130 Kg | $19 \mathrm{~m} * 14.6 * 1.1 \mathrm{~m}$ | $225 \mathrm{~cm} * 115 \mathrm{~cm} * 105 \mathrm{~cm}$ |

| 400,000 liters | 1.5 mm | $1380 \mathrm{Kg} 19 \mathrm{~m} * 17.6^{*} 1.2 \mathrm{~m}$ | $225 \mathrm{~cm} * 145 \mathrm{~cm} * 115 \mathrm{~cm}$ |
| :--- | :--- | :--- | :--- |
| 500,000 liters | 1.5 mm | $1750 \mathrm{Kg} \mathrm{24m*} 17.6 \mathrm{~m}^{*} 1.2 \mathrm{~m}$ | $225 \mathrm{~cm} * 190 \mathrm{~cm} * 115 \mathrm{~cm}$ |

## Flexible Tank Installation Instructions

The following shows typical setup and installation instructions for the collapsible tank. When setting up this tank, please make sure that the placement area is flat (not a slope) and free from stones, roots, or other sharp objects. When storing any tank, secondary containment is always recommended. Please contact your local DEQ and verify storage requirements with the EPA.

Step 1: Prepare the ground for tank placement by leveling the ground and clearing away all rocks, sharp stones, glass or other potentially harmful items.

Step 2 (Recommended): Lay out a berm liner or ground cloth (if applicable) in intended storage area. Berm should be flat and ready for the placement of the tank. If berm or liner is not being used, a sand layer can also be placed on the ground if needed for added support

Step 3: Unroll or unfold the tank
Step 4: Firmly connect the fill hose to the fill connection point. If no liner or cloth is being used for your tank, a smooth wood or plastic board can be placed under the filling and emptying points. This board should measure at least 30 $\mathrm{cm} \times 30 \mathrm{~cm}$. (Always make sure that your hose is compatible with the liquid you are storing in your tank to ensure safe filling.)

Step 5: Prepare your tank to be filled by checking that the discharge fittings are closed. Verify that there are no products or equipment that will get in the way of the tank as it is being filled.

Step 6: Begin to fill your tank. During this process, any air that is contained within the tank can be vented out through the center vent valve. If your tank has an automatic vent valve, this fitting will additionally work to prevent overfilling. Water will start to leak from small top openings for the valv when it has reached maximum capacity. For non-automatic ents, the ports will only work as a manual air relief device. the vent is not required to discharge the liquid. A pump can speed up the discharge if necessary.

Emptying the Tank: To empty your tank; connect discharge hoses to the discharge ports. When connected, open the gate or ball valve. Opening the vent is not required to discharge the liquid. A pump can speed up the discharge if necessary.

Note: A pipe thread sealant is recommended for all flexible tank fittings. This ensures there is no leakage. The sealant used should be compatible with the tank's contents. Sealant is not included.

## GALVANIZED Tank WITH MEMBRANES

The Galvanized Steel Tank, the newest product of TANK, has been designed to be a cost effective
specifically fills the market need where budget and performance need to be as close as possible to each other. The roof system has been redesigned for the series to include a soft top, replacing the conventional truss roof systems up to a diameter of $11,64 \mathrm{~m}$.

## Sample Applications

Capacity Chart

## Product Info

Use of $76.2 / 18 \mathrm{~mm}$ Corrugated Galvanized Steel Sheeting forms into a flexible system. The steel panels of the tank are coated with zinc layer on both sides to ensure long lasting performance in outdoor weather conditions. Is produced from 9,000 liters up to 3.000 .000 liters ( 3.000 tons) in-house using corrugated steel galvanized technology.

Has a special geomembrane liner inside to ensure the liquid stored inside does not contact with the steel parts. The standard geomembrane used in our tanks is certified for drinking water and can also be used to store other types of liquids. Fuel, industrial liquids and related chemicals can be stored using with membranes specially developed for purpose use. Please contact our sales team to inquire about storing industrial chemicals. The liner is produced using high frequency welding machines to ensure a perfect weld and water tightness. Standard liner is UV protected and prevents aquatic organisms such as mould, fungi etc. to form in our tanks.

## FICOOME

The tank offers 2 different steel roof systems. A triangle modular roof system and a truss based steel dome roof just like the Apollo Series. In the Triangle system the roof is separated in a number of panels, which are fitted together with watertight connection technology. In the truss dome system, the roof is first retrofitted with galvanized steel trusses, and then the roof area is covered by galvanized steel panels to complete the process.

Also have 2 soft top solutions for applications that do not require steel domes. The indoor flat cover is made out of high-quality geomembrane which is fixed on to the rooftop to make sure that the quality of water or the liquid inside is preserved. For outdoor applications, the conical shaped cover is specifically designed to offload rain and snow loads making sure that the water or liquid keeps its quality without contamination. Tank soft covers provide the perfect balance between budget and performance, making the product more attractive to a larger customer base.

All tank systems come with a standard level meter placed outside the tank. Digital and manual pulley type level meters are available as optional accessories upon request.

## Prime Applications

- Storage of potable and rain water
- Storage of industrial liquids
- Agriculture, Farms, Plantations (Manure Storage)
- Industrial Applications
- General Water Supply (residential or public use)
- Fish Ponds at fish-hatcheries
- Schools, Hospitals, Fire Departments
- Army Camps, UN Organizations and its sister agencies (UNICEF,WHO,WFP...ETC.),Military operations
- Recreational/ Theme Parks, Hotels, Resorts
- Mega-mall, Shopping centers
- Offices, Factory Plants, Municipal Districts (theme parks, offices)

## FOHOME

- Housing Properties, Remote Working Sites

## Advantages

- Thanks to its corrugated shell and hot dip galvanizing technology, is very durable both indoor and outdoor conditions
- Using the latest in geomembrane technology, makes sure that the liquid stored inside is not contaminated
- Having a modular design can be shipped anywhere in the world and erected on site very easily.
- , when produced in optional powder coated colors can easily blend into any environment.
- Is designed to withstand thunderstorms and earthquakes
