Background,

Universal Network for Knowledge & Empowerment Agency (UNKEA) is a national organization operating in South SP. UNKEA was founded in 2002 by a group of concerned men & women of Upper Nile state to address the dire social, economic, livelihoods, and Health conditions experienced by the South Sudanese Citizens. UNKEA's initial purpose was to solely fight the deadly Kalazar disease in Upper Nile. This was effectively achieved — prompting the organization to expand its mandate. UNKEA mandate has since expanded to include Primary Health Care, Nutrition Food Security & livelihoods, Water & Sanitation Education. Small development of youth and women. Economic development, Access to justice & Peace Building UNKEA is implementing health programs in various locations across South Sudan.

Job Description

Medical doctor work in hospitals, which means they are the first point of contact for patients needing medical attention. As a Medical Doctor, you'll see patients in the hospital. You'll examine the patient, assess their situation and decide what action to take at highest quality in accordance with national treatment guidelines. You'll often work in a team that includes nurses, midwives, and administrative support staff.

Job Purpose

The Medical Doctor with surgical skills will be overseeing the management of the health care facilities and supervising the clinical and reproductive health staff. They will oversee the

management of chronic diseases and clinical management of SGBV cases, the management of RH services including obstetric cases with complications.

The Medical Doctor with surgical skill will review cases and decide on referrals and will ensure a proper reporting system is in place with good surveillance of common diseases and integrating the Health Management Information system.

Additionally, the Medical Doctor with surgical skills be asked to conduct Caesarean sections, appendectomies and other emergency cases.

They will report to the Lot Manager and the health Specialist and work closely with the other health actors

Major Responsibilities:

- Jointly with the Medical Coordinator, plan implementation strategy and provide oversight of RH services in the hospital. Assist with set-up of RH services including HIV/AIDS and Emtct, layout, supply, guidelines and procedures.
- Ensure proper implementation of comprehensive primary health care in the Hospital with protocol and procedure in place.
- Apply medical knowledge and skills to diagnosis, treatment and prevention (helped by clinical examination and available laboratory services) and ensure patient follow-up.
- Ensure and organize medical activities at the clinic for patients and/or population that are culturally sensitive and that are in accordance with MoH protocols and guidelines, and with the universal hygiene standards taking into consideration quality and continuity of care.
- Ensure and participate in a 24-hour health service delivery system at the health facility.
- Conduct basic emergency surgical interventions mainly Caesarean sections and appendectomies when needed
- Monitor the medical activities by ensuring data collection, compilation and entry into the IMC health information systems, and contribute to the analysis and reporting of the data to inform future programming.
- Monitor closely morbidity and mortality trends together with all the other health indicators.
- Provide technical support to staff on the clinical management of SGBV cases and ensure proper communication and coordination with the different stakeholders involved in SGBV activities.

- Ensure that proposed emergency RH interventions are guided by the MISP (Minimum Initial Service Package for RU in Crisis Situations), including the following services/activities: Facility deliveries, Emergency Obstetric Care (EMOC) or referrals for EMOC, Early neonatal care, Family Planning, Post-Abortion Care, Screening of blood donors and safe blood transfusions, Clinical Care for Survivors of Sexual Assault (CC SAS), antenatal and post-natal care service.
- Conduct trainings to create capacity for MVA and long-term family planning service provision in the Hospital.
- Promoting a culture of learning whereby lessons-learned and good practices are documented and shared for institutional memory.
- Provide training periodically and on-job training that will ensure quality RH support services for the benefit of other medical staff.
- Participate in compiling, analyzing and submitting reports.
- Perform other duties as may be required by the supervisor, as the duties and responsibilities listed are representative of the nature and level of work assigned and are not necessarily all inclusive.

Qualification and work experience

- Education: Bachelor degree in Medicine and Surgery
- Be the holder of a valid practicing license
- Minimum of five years of experience required; or equivalent combination of education and experience;
- At least 2 years clinical and surgical experience in a developing world country and field busy hospital, Work experiences in South Sudan or regional experiences is a plus
- Work Experience: Medical Doctor with strong Clinical, Reproductive Health and Maternal/ Child Health background and strong surgical skills (caesarean sections and appendectomies as
