1. Who we are?

ShimaHr consultants is a Human Resource Consulting and Outsourcing Company that is currently managing the Human resource component of multiple clients in South Sudan and East African regions.

ShimaHr consultants is currently seeking to recruit a **production supervisor** for one of her clients in the distilling industry, a new operation bringing the highest quality beverages to the South Sudan market. Driven by quality, and product development process is customer-centric.

2. Position Summary

The production supervisor will own the end-to-end production process, overseeing the mechanical, electrical, instrumentation, quality, blending and packaging operations.
Core competencies: Quality and blending.

3. Responsibilities

- Monitor and maintain operations in accordance with established distillers standard operating procedures
- Daily quality assurance/quality control responsibilities
- Inventory management and record keeping
- Maintaining production schedules, forecasts, and goal achievement
- Supervise, manage and train team members on all required production skills, as needed
- Maintain safe work environment
- Research and Development/Recipe formulation in collaboration with Head Distiller and production team
- Milling, mashing, fermenting, and distilling vodka, gin, whisky, brandy, and more!
- Transferring of mash, fermentation, high wines, etc. in accordance with established company standard operating procedures.
- Proofing, blending, barreling and bottling of spirits
- Cleaning and sanitation of distilling, brewing, and bottling equipment
- Technical Product development
- Total Quality management with Six Sigma
- Plant operations management
- Team management
- Product packaging and safe storage
- Supplier quality management
- Risk, safety, and health ownership

REQUIREMENTS

- 3-5 years of previous distilling or brewing experience strongly preferred
- A desire to maintain a safe work environment
- Curiosity about new products, new ways of doing things, and constant improvement
- Intermediate knowledge of brewing process required
- Background in project management required
- Background in fermentation highly desired

- Background in chemistry or lab processes preferred, but not required
- Strong mechanical/light industrial background preferred
- Experience in the beverage industry, with a passion for craft beverages in particular
- Proven ability to work with little to no supervision.
- Relevant training and certification in industrial production, engineering, or any related field

How to Apply:

Interested candidates should submit their electronic application with the subject line **Production Supervisor** to jobs@shimahr.com. The cover letter should accompany a current CV detailing their experience for the post including day time telephone contacts and three referees, preferably previous line managers. The closing date for receiving applications will be **Friday 16th September 2022, 5PM CAT**.

The Position is open to both South Sudan nationals and non nationals. Only Shortlisted candidates will be contacted.
