

**Scope Of Work-**  
Ganyiel and Nyal generator repairs and Solar system maintence

**Statement of work:** Mercy Corps is seeking to contract a qualified mechanic who is able to independently work on Perkins Generators 13 - 22 KVA and work on solar installation and re-wiring in its two field offices (Ganyiel & Nyal) in Panyijar, Unity State, as specified in the table below.

1. Conduct assessment on the 13 - 22KVA generator and submit list of required parts to the logistics office to procure the parts in Juba. Upon receiving the parts, repair the generator with required parts and ensure the generator is in good working condition.
2. Re-install solar panels on a new outdoor solar stand for 12 solar panels to optimally charge the batteries.
3. Connect the generator to charge the batteries in the morning and in the evening to reduce the usage of the generator during the day and hence reduce on the fuel consumption

SN	Description of work	U/P for only work	Amount
<b>A</b>	<b>Ganyiel field office</b>		
1	Accessment of the 22 KVA generator to identify what parts are required		
2	Repair and service the 22 KVA Perkins generator and connect the genrator to charge the batteries and ensure the generator has a direct line to power the office and residence when need arises
