## Vacancy For Construction Engineer At Across Africa Development Organization (AADO)

### Introduction

Across Africa Development organisation (AADO) is a national organisation working in most of the states of South Sudan, in the themes of Gender and Protection, Food Security and Livelihoods, Education, Woman Empowerment, and looking at Health as well, and we are dedicated to work with the communities at this pivotal time. Across Africa Development organisation (AADO) is a 'dual mandate' organisation and as such equal priority will be given to both humanitarian and development work. This is the only way we are able to ensure that some of the fundamental rights that we believe woman have, such as survival, safety and constant access to protection and empowerment, can be guaranteed.

### **JOB DESCRIPTION FOR THE CONSTRUCTION ENGINEER**

Job title:	Construction engineer
Directly responsible to:	Project coordinator,
Duty Station	Ulang County-Upper Nile state
Opening date	28/08/2023
Closing date	15/09/2023
Start date	Immediately
Period of performance	6 months renewable depending on funding

The project engineer will be responsible for the construction of 5 blocks of temporary learning space (TLS) in Ulang county, upper Nile state. The engineer will oversee and ensure construction is done promptly and up to the set standard.

### Construction engineer roles and responsibility

- Participate in the planning, designing and managing the successful construction of the TLS project in Ulang county;
- Collaborate with the architect, constructor and AADO to develop project plan and specification including visibility study of the area, cost estimation and risk assessments to determine project viability;
- Maintain compliance with the safety- assurance plan so that the work is accomplished in an environmentally sound manner using safe work practices;
- Participate in engineering package reviews during the select, define and execute phases of projects and provide constructive input to the design team;
- Support the off-site project leaders through the stage-gated process of projects;
- Encouraging construction and operations personnel to review design packages early in the course of projects to eliminate rework and optimize construction;
- Anticipate and resolve problems encountered in the field to eliminate costly rework or retesting;
