Job title: Climate Smart Agriculture Specialist (Consultancy) - WACRESS Project
Project
Reporting to: Regional Technical Project Manager
Location: Aweil East
Availability: As soon as possible

Purpose of the position:

The consultancy work will start on October 7th, 2024 and all the processes and deliverables must be completed **within 60 days** of signing of the contractual agreement. The task is very time sensitive, and hence in the work plan the Climate Smart Agriculture Specialist should present in detail how he/she will successfully undertake the tasks within the specified timeframe.

ROLES AND RESPONSIBILITIES:

The Climate Smart Agriculture Specialist will be responsible for the following:

- 1) Provide a detailed Inception Report.
- 2) Engage with other relevant consultants (Chief Technical Advisor, Social and Environmental Safeguards Expert, Local Communication Specialist, Local Statistician/Economist, Monitoring and Evaluation Specialist, and National Gender and Community Engagement Expert.
- 3) Conduct a field-based assessment to assess and provide detailed information on site specific appropriate agriculture, livelihood and income diversification and value chain options for; i) crops and animal husbandry.

- 4) Review the climate information services and early warning advisory system available to farmers and pastoralists and provide recommendations for improving the availability and accessibility of the services for effective decision-making processes.
- 5) Identify appropriate climate smart farming practices, develop illustrated training modules and technical guidelines, and conduct training of trainers and refresher courses for extension workers on identified climate smart agricultural practices relevant to local contexts, seasonal calendars, building on traditional knowledge and practices.
- 6) Develop illustrated training modules and technical guidelines, and provide training to extension workers and line departments.
- 7) Develop illustrated modules and technical guidelines, and conduct training of extension workers (twice a year) involving both classroom and hands-on sessions for delivery of support to communities on income and livelihood diversification.
- 8) Conduct training of community development agents in mobilizing and forming gender equitable and responsive community-based groups and committees.
- 9) Conduct training of trainers and refresher courses for running pastoral field schools and extension support to livestock owners and pastoralists involving both classroom and hands-on sessions on livestock disease surveillance and animal-health care.
- 10) Provide training to extension services staff in Aweil to ensure available climate data and forecasts are timely and appropriately disseminated and accessible to users for effective on-the-ground decision making.

Required Education, training, license, registration, and certification

- 1) Advanced University Degree (at least MSc. or equivalent) in the area of Agriculture; Climate Change; Natural Resource Management; Food Security; Disaster Risk Reduction; Environmental Management; or a related discipline.
- 2) Well experienced in development/preparation of gender responsive and site-specific extension training modules and advisory packages for agro-pastoral communities.
- 3) Experience in climate change adaptation, climate smart agriculture, watershed restoration and management, agro-value chains and use of climate information services and early warning systems.

Experience

- 1) A minimum of 10 years' international experience in a senior technical lead position with planning and management of environmental and/or natural resources management programs in developing countries;
- 2) A minimum of 10 years in a senior technical position involved in development/ preparation of a detailed and illustrated gender responsive and site-specific extension training modules and advisory packages for agro-pastoral communities.
- 3) Demonstrated experience of working with climate smart agriculture planning processes is a must;

- 4) Previous similar experience in provision of technical support to complex projects and Global Environment Facility (GEF) financed project will be an added advantage;
- 5) Proven experience in developing consultancy works on climate change and adaptation;
- 6) At least 5 years' experience in facilitating TOT and subsequent monitoring of TOT participants;
- 7) Good understanding of South Sudan social and political context;
- 8) Familiarity with the local economic environment of South Sudan and East Africa is an advantage;
- 9) Impeccable communication skills, especially with adult learners and semi-illiterate participants;
- 10) Cross-cultural sensitivity, flexible worldview, emotional maturity and physical stamina.
