Job Opportunities

Background

PRO Seed Ltd is a seed company registered by the National Ministry of Justice and Constitutional Affairs and recognized by the National Ministry of Agriculture and Food Security of the Republic of South Sudan. In the last two years we have been transitioning from OPV seed production to development of maize hybrid varieties in collaboration with CIMMYT and MAFS. This year, we have started producing our hybrid seeds in Nzara. And in our business strategic plan, we shall be incorporating commercial maize grain production and milling of the grains from next year. This approach positions the company activities across the maize value chain, from breeding to seed production, and then to grain production and milling, so as to serve the final consumer with locally developed and produced food. This new strategic plan has created some job openings Production Officers to be based in Yambio and Maridi.

Position: 2 Production Officers (Yambio and Maridi)

The position holder to the Production Manager who is based in Yambio. The two positions are for Yambio and Maridi. While the Maridi Officer will be in charge of all the company production activities in Maridi, the Yambio Officer will be in charge of both Yambio and Nzara with the support of a Production Assistant who is based in Yambio. We are therefore seeking to recruit private sector driven individuals who are aggressive, passionate and dedicated agriculturalists to join our enterprising seed and maize value chain portfolio. The successful candidates will contribute to our efforts as change makers in the agriculture value chains in the respective counties through use of quality inputs to drive an agricultural revolution for economic transformation in Western Equatoria.

Job Tasks

The main Task: Ensure that profitable commercial farming is attained.
Specific tasks include;

- In liaison with local leaders, identify farmers who are interested, willing and capable of becoming commercial grain producers under contract farming scheme.
- Ensure commercial grain producers are served with quality extension services for increased productivity
- Ensure that a Farmer Service Center is Established and serving farmers with quality inputs and services
- Ensure commercial grain producers are equipped with adequate agribusiness skills to make their farming profitable.
- Promote adoption of better performing technologies especially mechanized farm operations, use of hybrid seeds, fertilizers and herbicides through demonstrations (mother and baby demos).

	• Ensure produced grains are aggregated and delivered timely for milling in accordance with the terms of the contract farming scheme. • Ensure farmers feedbacks are attended to create a healthy customer care relation. • Documentation of the work and its outcomes.
Requirements	Education • At least a Diploma in the field of agriculture from a reputable institution. Degree is an added advantage. Technical Knowledge and Experience • Experienced agronomist in working with farmers • Working in the agricultural private sector
Desirables	• Resident and/or extensive experiences of working in Yambio, Nzara and Maridi • Fluent in English and Knowledge of local language is very important. • A qualified motorbike rider • Ability to write reports. • A good extension worker
Start Date: 1st Feb 2026
