Airing of Radio Jingles on Flood Emergency Preparedness and Response

Date: 9<sup>th</sup> August 2024

---

**1. Background**

South Sudan is currently facing a severe flood emergency due to prolonged high-water levels in major rivers and lakes, exacerbated by forecasts of above-average rainfall. These conditions pose significant risks to communities, including displacement, food insecurity, and the spread of waterborne diseases. Vulnerable populations, including women, children, and the elderly, are particularly at risk.

To mitigate the impact of flooding and enhance community resilience, it is crucial to raise awareness and provide timely information on flood emergency preparedness and response measures. Effective communication through radio, a widely accessible medium across South Sudan, is essential for reaching and informing a broad audience about safety protocols, evacuation procedures, and essential services during emergencies.

**2. Objectives**

- Raise public awareness about the imminent flood emergency in South Sudan.
- Educate communities on effective flood emergency preparedness measures and response actions.

- Facilitate the dissemination of critical information to minimize the impact of flooding on vulnerable populations.

### 3. Scope of Work

The project requires radio stations in the four states of Upper Nile, Lakes, Unity, Jonglei and Eastern Equatoria to perform the following tasks:

- Airing of 5 radio jingles in 4 languages (English, Juba Arabic, Nuer, and Dinka).
