MINISTRY OF LABOUR
REPUBLIC OF SOUTH SUDAN, JUBA

Job Title: Data Analysis Coordinator – (South Sudan)
Location: Juba, South Sudan
Classification: Term – 11 months
Department: Humanitarian; Rooted in Trust 2.0 South Sudan project
Supervisor: Senior Humanitarian Project Manager
Estimated Start Date: September 28, 2021
Closing Date: October 18, 2021

PROJECT BACKGROUND

Internews is working at the frontline of the COVID-19 infodemic to ensure communities have access to timely, accurate, and responsive information that can help them make well-informed health choices. We support communicators in 100 countries, from radio stations in refugee camps, to news outlets, fact checkers or health and humanitarian communicators. We know that information is power, dignity and it can change lives.

The Rooted in Trust project works to combat COVID-19 rumors and misinformation in Afghanistan, Lebanon, Philippines, Colombia, Mali, Sudan, and South Sudan. We work to create impact at the local level and inform approaches to rumor management at the global level. The project is supported by a Global Technical Advisory team made up of media, humanitarian, data science and information management experts. In phase 1 of the project, we collected more than 19,000 rumors in 14 languages and supported more than 30 local trusted information providers. In this critical phase of the pandemic, we will build on these efforts to listen and respond to the information challenges faced by vulnerable groups in humanitarian contexts, encouraging open dialogue between citizens and scientists and stronger and more collaborative partnerships between information providers (such as local media) and humanitarian and health sources.

The Data Analysis Coordinator (DAC): (Location: South Sudan) will be tasked with analysis of qualitative and quantitative rumor data and working to find trends and information that help us to better understand community perceptions of the pandemic, vaccines and relevant issues. The DAC will manage analysis of data from different sources; capture relevant content from the data, identify trends and highlight high risk behaviors and beliefs. The DAC will organize and lead RiT 2.0 South Sudan project weekly editorial meetings to enable teams gain deeper insights and turn analysis into engaging visualization, writing analysis and contribute to development of content for various groups and materials for sharing/dissemination.

LOGISTICS

The ideal candidate is office based at Internews office, Juba South Sudan. However, remote candidates based elsewhere will also be considered. You must have work authorization in your location that does not require sponsorship from Internews.

OUR COMMITMENT TO FOSTERING A CULTURE OF BELONGING

We are an organization of dynamic, mission-driven individuals who are passionate about our core values and about supporting positive changes in the world.
