Invitation to Bid for Supply and Installation of Seed Processing Plant

About Us

PRO Seed Ltd is a private seed company engaged in seed production and trading in South Sudan. We are registered by the Ministry of Justice and Constitutional Affairs (Reg. No. 30,742) and recognized by the Ministry of Agriculture and Food Security as a seed company. We mainly produce seeds for field crops (maize, sorghum, cowpeas, groundnuts and sesame), with 20% of these directly from our farms, while 80% of these are produced by our out growers (contracted smallholder farmers) currently in Juba and Magwi Counties. We also partner with local farmers who produce seeds for local vegetables like okra, girgir, rigila and kudra.

Need for Seed Processing Plant

In our 2020 – 2021 plans, we have planned to establish a seed processing facility in Nesitu, Jukokwe Boma, Lokiliri Payam of Juba County. We are therefore soliciting for service providers to source and install a seed processing plant that has a Seed Cleaner and Seed Grader. Interested parties should consider the additional information below;

- The two machines (Cleaner and Grader) can either be separate or interconnected.
- Preference is for "Locally Fabricated Machines" from Uganda or Kenya
- Production output should be at least 5mt/hr
- The machines should come along with the appropriate generator(s) for running them

What is considered for an offer.

An offer to the successful bidder will be based on;

- Technical description of the machines (pictures and illustrations are encouraged)
- The quoted amount for machines and generator(s)
- Time frame for doing the work

Note;

- All communications should only be on email. Phone calls for clarifications are allowed
- Closing day for receiving bids is Friday 5th Sept 2020
- Detailed specifications have not been given to keep out unqualified bidders
- There is no compensation for preparing the bid documents.
- Only those who meet the requirements shall be contacted

Yours,

Procurement Team
