Job Title:	Obstetric & Gynecologist 1# Position
Country Program:	South Sudan
Location of Position:	Malakal
Job status:	Non -Relocatable
Position Opened for:	South Sudanese
Desired Start Date:	20th August'2022
Advertised date	29th July' 2022
Closing Date for Applications:	15th August' 2022

Organizational Background

International Medical Corps is a global, humanitarian, nonprofit organization dedicated to saving lives and relieving suffering through health care training and relief and development programs. Established in 1984 by volunteer doctors and nurses, International Medical Corps is a private, voluntary, nonpolitical, nonsectarian organization. Its mission is to improve the quality of life through health interventions and related activities that build local capacity in underserved communities worldwide. By offering training and health care to local populations and medical assistance to people at highest risk, and with the flexibility to respond rapidly to emergency situations, International Medical Corps rehabilitates devastated health care systems and helps bring them back to self-reliance.

Job Purpose:

Under the direction of the Project and Program Manager, the Obstetrician-Gynecologist (OB GYNs) will be based in Malakal Teaching Hospital, under Upper Nile State. He or she will closely work with Hospital Surgeon, Medical director, medical officers, Midwives and Nurses to ensure safe deliveries and provision of quality medical care to women during pregnancy (antenatal care) and after the birth (postnatal care). He or she will also advise and manage complex or high-risk pregnancies and births as well as complication related to delivery. He or she will be responsible for capacity building of clinical team in basic and provide comprehensive emergency obstetric and neonatal care and functionality of CeMONC center 24/7.

Essential duties/Job requirement:

Main Responsibilities

To perform this job successfully, an individual must be able to perform each essential function with or without reasonable accommodation. The tasks listed are representative of the nature and level of work assigned and are not necessarily all-inclusive.

Oversight of the OB GYNs ward

- Responsible to run the Malakal teaching hospital CEmONC services by ensuring that all the 9 indicators are fully available in the hospital.
- Responsible for all 9 signals functions of basic obstetrics and neonatal care and 9 signal functions in Malakal teaching hospital.
- To ensure appropriate and safe blood transfusion of blood using the existing standard operation procedures in place.
- To provide CEmONC services especially Caesarian sections and management of related complications.
- To ensure support to the skilled birth attendants in the maternity wards and ensure monitoring of labor is always done on partographs.
- To conduct daily clinical rounds with the maternal and child health workers in both the maternity, antenatal and postnatal wards.
- To provide outpatient services to those women who need gynecological services.
- To lead the staff capacity building in the hospital by conducting reproductive health trainings, on job coaching and mentorship.
- To be the focal person in ensuring appropriate infection prevention and controls in place in Malakal hospital.
- To ensure safe provision of parenteral anticonvulsants, antibiotics and oxytocin drugs.
- Monitor and treating expecting mothers during pregnancy, childbirth and postpartum period.
- Educating patients about diseases prevention and detection of reproductive health concerns.
- Able to respond to all obstetrics complications whenever needed.
- Practices the specialty ethically (has acquired appropriate attitudes i.e professional disposition and behavior towards colleagues, patients, relatives and communities)
- Recognizes the health needs of adolescents, females in reproductive age group & post-menopausal females
- Is competent to recognize and manage the pathological states related to reproductive system with knowledge of anatomy, physiology, endocrinology pharmacology & pathophysiology.
- Is aware of contemporary advances & developments in the field of maternal and newborn health & other related issues. (has all the required skills i.e. ability to integrate knowledge to clinical situations at an advanced Level) and has the confident understanding of a subject with the ability to use it for a specific purpose.
- Has acquired the basic skills in teaching of the Medical and Paramedical Professionals.
- Organizes and supervises the health care services, demonstrating adequate managerial skills in the clinic/hospital or the field situation where he is assigned.
- Is enthusiastic in advocating for maternal & newborn health.

- Ensure and supervise quality implementation of protocols (Prevention Parent to Child Transmission (PPTCT), Post Exposure Prophylaxis (PEP)) and social services (Voluntary Counseling and Testing (VCT), Information, Education and Communication (IEC), Sexually Gender Based Violence (SGBV), mental health services, etc.
- Ensure that proposed emergency RH interventions are guided by the MISP (Minimum Initial Service Package for RH in Crisis Situations), including the following services/activities: Facility deliveries, Emergency Obstetric Care (EMOC) or referrals for EMOC, Early neonatal care, Family Planning, Post-Abortion Care, Screening of blood donors and safe blood transfusions, Clinical Care for Survivors of Sexual Assault (CCSAS), antenatal and post-natal care service
- Conduct regularly monitoring visit to the maternity ward to assess the quality of the services deliver using a validated check list
- Monitor closely and regularly the medical activities by ensuring data collection, compilation and entry into the IMC health information systems, and contribute to the analysis and reporting of the data to inform future programming.
- Monitor closely morbidity and mortality trends together with all the other health indicators and raise action to be taken to reduce both morbidity and mortality of women
- Provide technical support to maternity and health facility staff on the use of guidelines for better clinical management of patients
- Ensure the IPC measures with the universal hygiene standards taking into consideration quality and continuity of care are in place in all supported facilities
- Ensure a 24-hour maternity health service delivery system at the health facility
- Identify training to be conducted for health providers to ensure the quality of services
- Provide training periodically and on-job training that will ensure quality RH support services for the benefit of other medical staff.
- Participate in compiling, analyzing and submitting health activities reports.
- Actively promote prevention of Sexual Exploitation and Abuse (PSEA).

Staff Management;

- The OB GYNs will be supporting the medical team to improve the quality of health services provision in the hospital. S/he will also support the Project Manager in providing him/her feedback and support related to the health staff performance as per their job description and objectives.
