

The Rescue Initiative South Sudan

PEPFAR Community HIV Services Monitoring Activity

This advertisement is for the PEPFAR Community HIV Services Monitoring Activity made possible by the generous support of the American people

POSITION- M&E officer (01)

DUTY LOCATION: Juba

REPORTS TO: Data Analyst

DEADLINE: 3rd Feb 2023

BACKGROUND

The Rescue Initiative South Sudan (TRI-SS) is a National Non-Governmental Organization that works to alleviate suffering among vulnerable communities in South Sudan. TRI-SS implements integrated health, nutrition, and peace projects in Kajo Keji, Tambura and Nagero counties. We have a long record of working with vulnerable communities in the most remote and hard to reach areas. Over the last 9 years, we have responded to natural and manmade disasters in Kajo Keji, Mundri East, West, Mvolo, Yei, Magwi, Lainya, Morobo, Yirol East, Maridi, Yambio, Tombura, Nagero, Akobo, Panyikang among others. Our approach to emergency response is grounded in the concept of the Triple Nexus (Emergency, Development & Peace). Moreover, our approach draws on evidence generated from the communities we serve, thus ensuring that the people affected and impacted by the problem are part of the solution. TRI-SS ensures that every response is sensitive to the existing beliefs, practices and existing coping mechanisms of the communities we serve.

We have a long record in conducting credible evidence generation assessments including on Ebola, COVID-19, Child protection and other Public Health Emergencies.

Our current donors include USAID, ECHO, SSHF and UNICEF. Our most distinguished partners include IMA World Health (USAID Momentum Project), GOAL Global (ECHO Project), Relief International (UNICEF Covid-19 Vaccination Project) and For Africa (UNICEF World Bank Project).

Activity Description

The PEPFAR Community HIV Services Monitoring Activity model employs the citizen's social science approach. This approach places the people affected and impacted by the problem at the center of the response. It empowers people living with HIV/AIDS to generate data on HIV prevention and treatment and for such communities to use their findings to identify and advocate for solutions that break down barriers to human rights, better health, and higher quality of life. The design has the potential to generate high-quality and credible data considering that the sample population and data collectors are drawn from the citizens (people living with HIV/AIDS).

The project is implemented in 11 counties (Juba, Yei; Torit, Magwi, Kapoeta South, Kapoeta East; Mundri East, Nzara, Yambio; Rumbek Central and Rumbek East) and 22 PEPFAR-supported health facilities (Rumbek State Hospital, Kiir Mayardit Women's Hospital, Pacong Primary Health Care Center (PHCC), Lui County Hospital, Nzara County Hospital, Nzara PHCC, Yambio PHCC, Yambio State Hospital, Nyokuron PHCC, Munuki PHCC, Kator PHCC, Gurei PHCC, Gumbo PHCC, Juba Military Hospital, New Site PHCC, Kapoeta State Hospital, Torit State Hospital, Nimule County Hospital, Juba Teaching Hospital, Al Sabah Children Hospital, Magwi PHCC and Yei Civil Hospital)

Scope of work

1. The M&E officer will be engaged to offer services of Training of data collectors, regular supervision, Data transmission, dissemination, and quality audits on behalf of the PEPFAR Community HIV Services Monitoring Activity in accordance with the following Terms of Reference. The M&E officer must strictly comply with the TRI-SS's ethical policies and procedures, including confidentiality.

Specific activities to be carried out by the M&E Officer

The M&E officer will perform the following specific tasks and submit the assigned deliverables to the Data Analyst:

1. Design a training plan, and as guided by the PEPFAR prescribed training guidelines, as refined and in consultation with the Data analyst, train community-based data collectors and county-based data supervisors.
2. Routinely follow up with the Community Based data collectors and county-based data supervisors on reporting timelines
3. Using a designed template, conduct supportive supervision for community-based data collectors and county-based data supervisors, provide mentorship to ensure the preservation of quality in data collection.
4. Conduct site verification of data and report to the data analyst on the quality of data collected including gaps identified.
5. Participate in data analysis and providing technical guidance on data linkages with the source.

To qualify as an M&E officer, you will have:

Education: A bachelor's degree in M&E with knowledge of computer applications and research protocol

Experience: Three to five years of professional experience in field data collection, research, training, and PowerPoint presentation, and experience with the use of Open Data Kit (ODK) and software for qualitative data analysis.
