VA – NO: SCI/HR/2021 **State Health Cluster Co-Coordinator Jonglei State**

Save the Children is an international non-governmental organization that works for a future of children, their families and communities realize social equity and dignity; have access to their basic physical, emotional and development needs.

SCI is seeking to recruit: -

Job Title:	State Health Cluster Co-Coordinator Jonglei State (01)
Location:	South Sudan
Reports to:	PDQ Director and Health Cluster Coordinator
Contract period:	12 Months

ROLE PURPOSE:

Access to health care remains a challenge in South Sudan due to the cumulative effects of years of conflict, an underdeveloped health care system and limited investment in basic services including health care in addition to a surge in sub-national violence, flooding and COVID-19 Pandemic. There are at least 5.2 million people in need of health services in 2021 and only 7.5 per cent of the 1,763 reporting health facilities provide basic health services¹. The absence of basic health care including vaccination services has resulted in low immunization coverage throughout the country, increasing the risk of vaccine preventable disease outbreaks. Six out of ten states have been affected by vaccine-derived polioviruses outbreaks and eight counties reported measles outbreaks in 2020. South Sudan's maternal mortality ratio is one of the highest in the world with only, the ongoing conflict and COVID-19 lockdown measures heightened the risk of gender-based violence especially for women and girls. HRP 2021 also highlighted the increased risk for GBV and the needs for proper clinical and protection services.

The key challenges in South Sudan of food insecurity, flooding, COVID-19 and localized disease outbreaks necessitate strong coordination. SC health cluster is composed of 64 organizations, each making a valuable contribution but limited by funds. Only one State Health Cluster Coordinator and team is funded at present; this is in Jonglei state, one of the most vulnerable of the ten states, affected by food insecurity, difficult terrain and interstate conflict. A strengthened health cluster will ensure maximum impact from partners through gap analysis, coordination, inter-sectoral collaboration, strong reporting and advocacy at national and state level informed by integrated programmes at community, primary and secondary services level and county coordination in highly vulnerable states and counties.

SC will support state level health cluster coordination supporting the Jonglei State Health Cluster Co-Coordinator. SC will use the implementation experience of Akobo to help inform state coordination and in turn the contribution at state level to support national coordination. SC will support the health cluster coordination mechanism through support to reporting, coordination, resourcing, gap analysis, inter-sector coordination and reflecting out SC's direct experience at state and county level.

This support at national level will be supported by Save the Children's global humanitarian health team who are members of the global health cluster and will enable the cluster experience at national level to be linked to international lessons learnt and advocacy for South Sudan and the cluster system as a whole.

The South Sudan Health Cluster strives to build upon existing coordination structures making principled health action as local as possible to provide timely, effective and appropriate actions to minimize the health impacts of humanitarian and public health emergencies through strengthening of service delivery, addressing gaps, and promoting effective leadership. The Jonglei State Health Cluster supports the well-being, safety, dignity and resilience of the affected population through coherent, coordinated and integrated health response. Working with national counterparts, the State Health Cluster is responsible for facilitating and coordinating the engagement of partners to deliver quality programmes and services to meet humanitarian needs, improve accountability and to promote meaningful access, safety and dignity in all phases of the Health Cluster response in Jonglei State. Effective and efficient cluster management is a shared responsibility held by all State Health Cluster partners. The State Health Cluster Team, led by the State Health Cluster Coordinator, are the impartial representatives of the cluster as a whole and are responsible for the overall coordination and facilitation of the work of the cluster in the state.

The State Cluster Co-ordinator works in tandem with the State Health Cluster Coordinator providing leadership and facilitating the processes that will ensure a well-coordinated, strategic, adequate, coherent, and effective response. The overall purpose of co-coordination is to improve the timeliness and impact of appropriate humanitarian health assistance for crisis-impacted communities and to strengthen the collective health outcomes of the response. In holding the position, the Health Cluster Co-Coordinator will have specific responsibility for ensuring that the position is informed by the partners' perspective. The incumbent will also be responsible for ensuring that the cluster membership is contributing to and sharing Cluster responsibilities, and will play a key role in developing the active engagement and technical capacity of health cluster partners / members of the Cluster.

In the event of a major humanitarian emergency, the role holder will be expected to work outside the normal role profile and be able to vary working hours accordingly.

KEY AREAS OF ACCOUNTABILITY:

Coordination and NGO representation

- Support the regular coordination efforts/activities including meetings with State Cluster members, building on existing health cluster coordination fora through supporting the organization and chairing meetings (chairing the meetings and drafting meeting minutes during absence of cluster coordinator).
- Contribute effectively to inter-cluster coordination forums and cooperate with other clusters, Government counterparts, and relevant authorities (as appropriate) in planning, coordination, and operational activities, ensuring that the NGO community is contributing to and sharing responsibilities.
- Coordinate the establishment and work of State Cluster sub-groups, ensuring a productive outcome and consistency with humanitarian and national policies and standards.
- Promote the leadership roles of NGOs within the State Health Cluster and ensure that all working groups have active national and international NGO participation to help ensure that NGOs support and influence the clusters work.
- The State Co-Coordinator should act as a focal point for receiving NGO concerns in order to raise these with the State Health Cluster Coordinator and the State Cluster Lead Agency to strengthen accountability and transparency of the cluster's decisions and work.

Preparedness

- Ensure adequate contingency planning and preparedness for new emergencies and seasonal adaptation of responses that reflect the actual and potential to scale-up capacities of all partners (local and international).
- Ensure adequate contingency planning and preparedness for new emergencies and seasonal adaptation of responses that reflect the actual and potential to scale-up capacities of all partners (local and international).

Response

- Work with the cluster coordinator to ensure that the State Cluster Lead Agency (CLA) and National Health Cluster Coordinator is informed of priority gaps that cannot be covered by any Cluster partner and require CLA action as provider of last resort.
- Support the planning, preparation, implementation, monitoring and evaluation of Flash Appeals, Contingency plans and Strategic and Humanitarian Response Plans providing assessment analysis and proposals that cover state needs, health and inter-cluster strategies.

Deputizing

- In absence of the State Cluster Coordinator, represent the State Health Cluster in inter-cluster coordination mechanisms at state level, contribute to jointly identifying critical issues that require multi-sectoral responses, and plan the relevant synergistic interventions with the other working groups/clusters concerned.

Assessment and Reporting

- Working closely with the Information Management Officer, facilitate the collection of relevant cluster data using cluster approved tools from all partners, implementation and dissemination of the Indicator Monitoring Framework and ensure the Office for the Coordination of Humanitarian Affairs (OCHA)- managed 4W database and dashboard are regularly updated.
- Together with Health partners identify gaps in health capacities and, based on findings, develop and roll out inter-agency capacity building activities to address them. Promote capacity building of health sector personnel, of partners and national authorities.
- Lead and/or co-lead, coordinate and conduct state health needs assessments with the health partners and other sectors in particular, but not limited to, WASH Nutrition, Food Security and Protection. Ensure results are documented in relevant information tools, which are accessible to all partners and donors for addressing needs.

Monitoring and Evaluation

- Assist the health cluster to develop, adapt and implementation of monitoring framework to ensure effective implementation of health cluster strategies and plans.
- Participate in reviews of state health cluster coordination mechanisms and their adaptation over time to reflect the evolving crisis and the capacities of local actors. Lead and contribute to the joint analysis of health-cluster data leading to identification of gaps in the health cluster response, sharing feedback with cluster partners and agreement on priorities to inform the development (or adaptation) of a health emergency response actions and strategy.
- Represent the health cluster in field and conduct field visits in close collaboration with the health cluster, authorities, partners and coordination mechanism in state.

Advocacy

- Identify core advocacy concerns for the Health Cluster through a consultative process: develop joint cluster/ inter-cluster initiatives to ensure regular and consistent advocacy.
- Represent the interests of the Health Cluster in discussions with stakeholders on priorities, resource mobilization and advocacy. Taking additional steps to ensure that the resource mobilization and advocacy efforts fairly represents and benefits NGOs as well as the UN agencies in support of the agreed health cluster strategy. Advocate for projects submitted through the cluster to analyses and take into consideration the specific needs, priorities and capacities of both the female and male population of all ages in an early recovery approach.

Addressing Mainstreaming Issues

- Ensure State Cluster members are aware and taking into account all cross cutting issues in humanitarian work such as gender and accountable to affected populations through consultative mechanisms.

- Ensure protection and early recovery are mainstreamed and awareness of the different needs and capacities of women, girls, boys and men of all ages, people with disabilities, and other diversity characteristics such as ethnicity and religion are informing what we do, how we do it and with whom to promote meaningful access, safety and dignity in all phases of the health sector response.

Perform other cluster related incident-specific duties as required by the functional supervisor.
