Payment by the Contracting Authority does not imply acceptance of the Goods.

3.5. If the Contracting Authority fails to issue an acceptance certificate within a period of 45 days from actual delivery of the Goods at final destination, successful completion of the tests, successful installation and commissioning, whichever is the latest, the Contracting Authority shall be deemed to have issued the acceptance certificate on the last day of that 45-day period. 3.6. Notwithstanding any other rights of, or remedies available to, the Contracting Authority under the Contract, in case any of the Goods are defective or otherwise do not conform to the Contract, the Contracting Authority may, at its sole option, reject or refuse to accept the Goods, and the Seller shall promptly proceed in accordance with article 4.3.

4.2. Unless provided otherwise in the Contract, all warranties shall remain fully valid for a period of one year after acceptance of the Goods by the Contracting Authority.

4.3. During any period in which the Seller's warranties are effective, upon notice by the Contracting Authority that the Goods do not conform to the requirements of the Contract, the Seller shall promptly and at its own expense correct such non-conformities or, in case of its inability to do so, replace the defective Goods with goods of the same or better quality or fully reimburse the Contracting Authority for the purchase price paid for the defective goods including freight costs to the final destination. The Seller shall pay all costs relating to the repair or return of the Goods as well as the costs relating to the delivery to final site of any replacement goods to the Contracting Authority. If having been notified by any means, the Seller fails to remedy the defect within 30 days, the Contracting Authority may proceed to take such remedial action as may be necessary, at the seller's risk and expense and without prejudice to any other rights which the Contracting Authority may have against the Seller under the Contract.

4.4. The Seller shall indemnify and hold harmless the Contracting Authority from and against any and all suits, actions or administrative proceedings, claims and demands from third-parties, losses, damages, costs, and expenses of any nature, including legal fees and expenses, which the Contracting Authority may suffer as a result of any infringement by the Seller of the warranties specified in article 4.1.

However, the ceiling of these penalties is 10% of the total Contract price.

If either Party considers that any circumstances of force majeure have occurred which may affect performance of its obligations, it shall promptly notify the other Party and the Contracting Authority, giving details of the nature, the probable duration and the likely effect of the circumstances. Unless otherwise directed by the Contracting Authority in writing, the Seller shall continue to perform its obligations under the Contract as far as is reasonably practicable, and shall employ every reasonable

If the Contracting Authority terminate this Contract in whole or in part upon written notice to the Seller. Any claim by the Seller for such actual costs shall be deemed waived by the Seller unless submitted in writing to the Contracting Authority within thirty (30) calendar days after the Contracting Authority notified the Seller of the termination.

9. VARIATIONS

The Contracting Authority may at any time by written instruction vary the quantities of the Goods by 25 percent above or below the original Contract price. The Contracting Authority may also order variations including additions, omissions, substitutions, changes in quality, form, character, and kind of the Goods, related services to be provided by the Seller, as well as method of shipment, packing, place of delivery and sequence and timing of delivery. No order for a variation may result in the invalidation of the Contract, but if any such variation causes an increase or decrease in the price of or the time required for performance under this Contract, and except where a variation is necessitated by a default of the Seller, an equitable adjustment shall be made in the Contract price, or delivery schedule, or both, and the Contract shall be amended by way of an addendum. The unit prices used in the Seller's tender or quotation shall be applicable to the quantities procured under the variation.

CODE OF CONDUCT FOR CONTRACTORS

ETHICAL PRINCIPLES AND STANDARDS

By this Code of Conduct, the Contracting Authority applies ethics to procurement. We expect our contractors to act socially and environmentally responsible and actively work for the implementation of the standards and principles in this Code of Conduct. The Code of Conduct is applicable for all our contractors who supply goods, services and works to our operations and projects.

This Code of Conduct and its related principles and standards are based on recommendations from the Danish Initiative for Ethical Trade (DIEH)¹, the UN Global Compact principles² and ECHO's Humanitarian Aid Guidelines for Procurement 2011³.

General Conditions

The Code of Conduct defines the ethical requirements and standards for our contractors, whom we expect to sign and respect the Code of Conduct, and work actively towards the implementation hereof. By signing the Code of Conduct contractors agree to place ethics central to their business activities.

The provision of the ethical standards constitutes minimum rather than maximum standards. International and national laws shall be complied with, and where the provisions of law and the Contracting Authority's standards address the same subject, the highest standard shall apply. It is the responsibility of the contractor to assure that their contractors and subcontractors comply with the ethical requirements and standards set forth in this Code of Conduct.

The Contracting Authority acknowledge that implementing ethical standards and ensuring ethical behaviour in our supply chain is a continuous process and a long term commitment for which we also have a responsibility. In order to achieve high ethical standards for procurement we are willing to engage in dialogue and collaboration with our contractors. In addition we expect our contractors to be open and willing to engage in dialogue with us to implement ethical standards for their businesses.

Unwillingness to co-operate or serious violations of the Code of Conduct will lead to termination of contracts.

Human Rights and Labour Rights

Contractors must at all times protect and promote human- and labour rights and work actively to address issues of concern. As a minimum they are obliged to comply with the following ethical standards:

- **Respect for Human Rights** (UN Universal Declaration of Human Rights)
The basic principles of the Universal Human Rights are that all human beings are born free and equal in dignity and in rights, and everyone has the right to life, liberty and security of the person. Contractors must not flaunt their responsibility to uphold and promote the Human Rights toward employees and the community in which they operate.
- **Non exploitation of Child Labour** (UN Child Convention on the Rights of the Child, and ILO Convention C138 & C182)
Contractors must not engage in the exploitation of child labour⁴ and contractors must take the necessary steps to prevent the employment of child labour. A child is defined as a person under the age of 18 and children shall not be engaged in labour that compromise their health, safety, mental and social development, and schooling. Children under the age of 15 (in developing countries 14) may not be engaged in regular work, but children

above the age of 13 (in developing countries 12) can be engaged in light work if it does not interfere with compulsory schooling and is not harmful to their health and development.

- **Employment is freely chosen** (ILO Convention C29 & C105)
Contractors must not make use of forced or bonded labour and must respect workers freedom to leave their employer.
- **Freedom of association and the right to collective bargaining** (ILO Convention C87 & C98)
Contractors must recognise workers right to join or form trade unions and bargain collectively, and should adopt an open attitude towards the activities of trade unions (even if this is restricted under national law).
- **Living wages are paid** (ILO convention C131)
As a minimum, national minimum wage standards or ILO wage standards must be met by contractors. Additionally a living wage must be provided. A living wage is contextual, but must always meet basic needs such as food, shelter, clothing, health care and schooling and provide a discretionary income⁵ - which is not always the case with a formal minimum wage.
- **No discrimination in employment** (ILO Convention C100 & C111 and the UN Convention on Discrimination against Women)
Contractors must not practice discrimination in hiring, salaries, job termination, retiring, and access to training or promotion - based on race, national origin, caste, gender, sexual orientation, political affiliation, disability, marital status, or HIV/AIDS status.
- **No harsh or inhumane treatment of employees**
The use of physical abuse, disciplinary punishment, sexual abuse, the threat of sexual and physical abuse, and other forms of intimidation may never be practiced by contractors.
- **Working conditions are safe and hygienic** (ILO Convention C155)
Contractors must take adequate steps to provide safe and hygienic working environments. Additionally workers safety must be a priority and adequate steps must be taken to prevent accidents and injury to health associated with or occurring in the course of work.
- **Working hours are not excessive** (ILO Convention C1 & C14)
Contractors must ensure that working hours comply with national law and international standards. A working week of 7 days should not exceed 48 hours and employees must have one day off per week. Overtime shall be compensated, limited and voluntary.
- **Regular employment is provided** (ILO Convention C143)
All Work performed must be on the basis of a recognised employment relationship established through international conventions and national law. Contractors must protect vulnerable group's regular employment under these laws and conventions and must provide workers with a written contract.

International Humanitarian Law

Contractors linked to armed conflicts or operating in armed conflict settings shall respect civilian's rights under International Humanitarian Law and not be engaged in activities which directly or indirectly initiate, sustain, and/or exacerbate armed conflicts and violations of International

Humanitarian Law⁶. Contractors are expected to take a 'do no harm' approach to people affected by armed conflict.

Additionally, Contractors shall not be engaged in any other illegal activity.

Involvement in Weapon Activities

The Contracting Authority advocates for the Ottawa Convention against landmines and the Convention on Cluster Munitions against cluster bombs. Contractors shall not engage in any development, sale, or manufacturing of anti-personnel mines, cluster bombs or components, or any other weapon which feed into violations of International Humanitarian Law or is covered by the Geneva Conventions and Protocols.

Protection of the Environment

The Contracting Authority wishes to minimise the environmental damages applied to nature via our procurement activities and we expect our suppliers and contractors to act in an environmentally responsible manner. This involves respecting applicable national and international environmental legislation and acting in accordance with the Rio Declaration.

As a minimum contractors should address issues related to proper waste management, ensuring recycling, conservation of scarce resources, and efficient energy use.

Anti-Corruption

Corruption is by the Contracting Authority defined as the misuse of entrusted power for private gain and it includes bribery, fraud, embezzlement and extortion. The Contracting Authority holds a great responsibility to avoid corruption and ensure high standards of integrity, accountability, fairness and professional conduct in our business relations. Contractors are expected to have the same approach by undertaking good and fair business ethics and practices, take action to prevent and fight corruption, and abide by international conventions as well as international and national laws. To fight corruption and promote transparency, contractors who are confronted with corrupt practices are advised to file a complaint in the DCA Complaint Mechanism⁷.

A contractor's involvement in any form of corrupt practice during any stage of a selection process, in relation to the performance of a contract or in any other business context is unacceptable and will lead to the rejection of bids or termination of contracts.
